TOP DRAGSTER PACKAGE FROM SPITZER RACE CARS

Greenfield, IN - Highly respected SFI builder Spitzer Race Cars has introduced a 2012 series chassis for the increasingly popular Top Dragster class that incorporates enhanced car features and options, plus attractive package pricing. Base price for the car, which includes a carbon fiber body and wing, is \$14,950. It is built to SFI 2.5C specifications (6.00 to 7.50 quarter-mile elapsed times).

Driver safety and comfort is a primary focus of the revised design, with cage widths of 21, 23 and 25 inches offered, as well as special “kick-out” in the seat that provides extra elbow room. The standard wheelbase is 272"—although it can be extended to 287" depending on the customer’s choice of engine and driveline. It is a fast-reacting “hard tail” design and a proven 6.0-performer with appropriate power. A special high velocity “lump” wing and several different elements are offered for higher speed cars (up to 230 mph). 4-link models are also available.

The carbon fiber body, seat and wing are manufactured in-house at Spitzer Composites and included in the base car. A wide variety of aerodynamically designed air scoops are available options. Many other options are offered, up to an including a complete “roller.” Spitzer Race Cars is responsible for building many event and championship-winning race cars—including many in Top Dragster.

Full details can be found on Spitzer’s newly revamped website, www.GoSpitzer.com, or available by calling 317-894-9533.

The company is located just east of Indianapolis at 6135 W. 400 North, Greenfield, IN, 46140.
