**SnugPro CHU Debuts
 At Texas State Fair**

*October, 2013
 FOR IMMEDIATE RELEASE*

Highly respected truck cap and tonneau manufacturer SnugTop continues to expand its line of commercial products, with the latest addition being a Cab-Hi Utility cap known as the SnugPro CHU. The rugged, lightweight topper caught the eye of GM officials, who included a SnugPro CHU-equipped 2014 Chevrolet Silverado Crew Cab in their “Work Ready” Truck Exhibit at the recent Texas State Fair near Dallas.

The SnugPro CHU is made from Advanced Structural Composites (ASC) and is about half the weight of a steel cap. Its cab-high design and flush-mount ASC side access doors are aerodynamically efficient and also contribute to optimum fuel economy. SnugTop’s new ergonomically engineered cap also features an oversized double rear door that is split 40/60% on the driver’s side and passenger side—an industry first. The doors come with stainless steel hinges and a folding T-handle lock, and can be equipped with security-screened windows.

Versatility is another key attribute of the SnugPro CHU, as it is available with many door, shelving and rack options, plus a back-up camera and back-up alarm. Also available are toolboxes, a strobe light and strobe light holder, plus different sized tube caddies. The SnugPro CHU can be outfitted for a wide variety of commercial applications.

As a final touch, the SnugPro CHU is painted to match OEM truck colors using the DuPont ChromaPremiere® system. For additional information visit www.snugtopcommercial.com or call 1-800-768-4867.
