Owners of the highly desirable 1967-68 Mercury Cougar can now upgrade their instrument panels with a new package from Classic Dash. Available with or without provisions for air conditioning vents, the new panels are bolt-in replacements for the factory dash. They are available with a wide selection of Auto Meter gauge styles, with most enthusiasts opting for a tachometer, speedometer, oil pressure, water temperature and fuel quantity gauges, as well as a voltage meter to replace the original offerings

The two-piece, full-width dash panels are manufactured from a rugged UV-resistant ABS composite material in a choice of matte black, brushed aluminum or carbon fiber finish—a contemporary replacement for factory faux wood and grained panels.

Installations can easily be performed by do-it-yourselfers using common tools. A companion wiring harness, complete with a detailed instruction booklet, is available.

To see what the Cougar dash looks like with various finishes and gauges visit Classic Dash’s interactive website; [www.classicdash.com](http://www.classicdash.com). Personalized technical assistance is available toll-free at 866-882-3525. Products are manufactured in-house in Classic Dash’s Carson City, NV facility.
