#1206-282

For all of its attributes, the LS-series engine has some serious shortcomings in the lubrication department. Noted oil systems manufacturer Aviaid has developed a number of solutions to the problems at hand and they're detailed in a newly published LS Oil Systems Guide. Aviaid's offerings range from a single-stage external wet sump pump for street applications to multi-stage dry sump systems for competition.

Aviaid oil systems have been employed by championship-winning Corvette GT3 teams, and the company also offers complete packages for LS engines used in off-road, marine, drag racing and sports car competition—as well as high performance street use.

Most of the systems can be fitted with either the original Aviaid Series 1 pump, or the compact Series 2 design. They are available with up to six sections and a choice of seven section widths to facilitate providing the optimum scavenging and pressure/volume for any application. Aviaid also offers over a dozen different oil pans, which range from ultra low profile CNC-machined billet aluminum pans to fabricated steel models—as well as modified OEM pans.

The LS Oil System Guide can be downloaded at www.aviaid.com, or printed versions available upon request by e-mailing aviaid@aol.com.

Personalized technical assistance can be obtained by calling 818-998-8991. Founded in 1961, Aviaid is located at 10041 Canoga Ave., Chatsworth, CA 91311.
