

SNUGTOP DEBUTS "GB SPORT" CAP

Snugtop—the company known for its innovative styling and engineering prowess—has developed a distinctive new truck cap that superbly compliments the latest factory designs. Called the “GB Sport,” it has such important styling cues as a scalloped and recessed side window plus a subtle rear spoiler with a built-in LED brake light.

Featuring one-piece Advanced Structural Composite construction, the GB Sport is individually painted to match the factory color using the highly regarded Axalta Chroma/Premiere system and carries Snugtop’s Lifetime Warranty on structure and finish. An optional “Sportsman Package” increases the GB Sport’s load carrying capacity and the cap can be fitted with a wide array of roof racks and accessories.

The glass side windows pop-out in the rear and the generous curved all-glass tailgate provides optimum visibility. Additional construction highlights include a rotary latch with stainless steel rods and a Snugrug interior shell headliner.

A double bulb rubber seal protects the bed from damage, and the cap is installed using Snugtop’s no-drill mounting system (J-hooks). For additional information visit www.snugtop.com, or call 562-432-5454. All Snugtop products are manufactured at the firm’s Long Beach, CA facility.
