 FOR IMMEDIATE RELEASE

**1964-65 FALCON/RANCHERO PANELS
 FROM UNDERCOVER INNOVATIONS**

With 1964-65 Falcons, and their truck-bedded cousin, the Ranchero, enjoying a popularity renaissance, the underhood experts at Undercover Innovations have focused their attention on this unique breed.

Undercover Innovations has expanded its popular line of “show panels” to include the 2nd Generation Falcon—many of which came with the optional V-8. The panels cover the exposed area between the radiator core support and grille without hindering hood latch operation. They also serve to improve cooling, directing air to the radiator.

Show panels are made of aluminum and come black anodized, polished or natural finish. Custom engraving is available, incorporating artwork supplied by the customer or in a variety of type styles.

For those who desire a competition flavor, the panels are available with a series of die-formed and radiused holes. Additional information is available by calling Undercover Innovations at 661-325-4506, or visiting www.UndercoverInnovations.com. The company is located at 3624 Buck Owens Blvd., Ste. 12, Bakersfield, CA 93308.
