NEW CATALOG FROM MARK WILLIAMS ENT.

April, 2017
FOR IMMEDIATE RELEASE

Highly regarded driveline and chassis component manufacturer Mark Williams Enterprises has just published a new catalog (No. 25) that showcases the Colorado-based firm's many products. The 88-page publication also contains a wealth of valuable tech info on axles, brakes, chassis, driveshafts and rear ends.

Much of the publication content is important information for do-it-yourself car builders. In addition to offering everything from blueprints and build lists for tube-chassied race cars (contemporary or nostalgia) to a wide array of individual components, M-W has developed a number of special tools to aid in race car construction.

M-W's primary products, including Hi-Torque axles, lightweight drag racing disc brake systems, the industry's widest selection of driveshafts, and modular rear ends for 9" Ford, GM 12-bolt, and exclusive 11" design, are fully detailed in the new publication.

A printed "hard copy" of the catalog is available for \$3 postpaid, and it's also available online for immediate downloading at www.MarkWilliams.com. Remit to M-W Enterprises, 765 S. Pierce Ave., Louisville, CO 80027. Racers are invited to call 800-525-1963 for personalized technical assistance from M-W's experienced staff.
