

New 2017 Catalog From Art Morrison Enterprises

Award-winning chassis and suspension components manufacturer Art Morrison Enterprises has released its 2017 catalog. AME's products have earned a stellar reputation among prominent builders of street rods, classic trucks and muscle cars. The 72-page publication details the firm's chassis, front and rear clips, suspension components and equipment for do-it-yourself car constructors.

The catalog covers additions to the line of GT Sport chassis, the Fife, Washington firm's hallmark product. These precision fixture-built chassis, which include body and bumper mounts, core support, steering, engine mounts and a variety of suspension options are virtual bolt-in replacements for OEM frames. Also detailed are Morrison's MaxG muscle car chassis and various custom designs for pickups, convertibles and fat-fendered hot rods. Most are available with Morrison's new Multi-Link IRS, which is now available in a variety of configurations and cradle sizes.

Front and rear clips are also an important part of the Morrison product line, with a wide array of suspension options detailed in the catalog. Ancillary components, such as brakes, shock absorbers, steering and rear end housings are also covered in depth.

Morrison's 2017 catalog is now available for browsing or downloading at www.ArtMorrison.com. Printed copies are available free of charge at a variety of NSRA and Goodguys events, and they can be mailed for a nominal fee to cover postage and handling. Call AME's tech staff at 800-929-7188 for personalized assistance.
