

## **TOYOTA FJ40 & FJ60 LAND CRUISER PANELS FROM CLASSIC DASH**

Owners of 1960-81 Toyota FJ40 and 1981-87 FJ60 Land Cruisers can easily upgrade their vehicles with instrument panels from industry leader Classic Dash. They are made from durable, UV-resistant ABS composite material that comes in black matte, brushed aluminum and carbon fiber finishes. Classic Dash 2-hole panels are bolt-in replacements for the OEM units and come with premium Auto Meter gauges. Panel and gauge packages are priced from \$659.95.

Special multi-purpose electric gauges are employed, with both 3-3/8" and 5" diameter sizes available. The smaller are offered in Auto Meter's "Designer Black" or "Arctic White" colors and the 5" are black only. One gauge combines the speedometer and tachometer, while the other displays oil pressure, water temperature, fuel quantity and voltage.

Only commonly available tools are needed, and the swap can be performed by competent do-it-yourselfers in an afternoon. The installation is made even easier with a specially designed wiring harness that interfaces with the factory loom and includes a fuel gauge module that eliminates the need to change the sending unit in the tank.

For additional information go online to [www.ClassicDash.com](http://www.ClassicDash.com) or call 866-882-3525. Panels are manufactured in-house at Classic Dash's facility at 5055 Metric Way in Carson City, Nevada 89706.
