

## **INSTRUMENT PANELS FOR 1981-93 DODGE TRUCKS BY CLASSIC DASH**

A practical upgrade for the First Generation Ram is now available in the form of bolt-in replacement instrument panels from Classic Dash.

The rugged UV-resistant ABS composite panels are available in matte black, brushed aluminum and carbon fiber finish—attractive alternatives to the factory faux wood grain and plain panels.

More importantly, the Classic Dash panels accommodate six precision Auto Meter gauges to keep track of engine RPM, speed, oil pressure, water temperature, fuel level and voltage with a choice of 5" or 3-3/8" speedometer/tachometer. What's more, a GPS speedometer upgrade is available to provide a multitude of additional information and tracking. There are 15 Auto Meter gauge styles to choose from, as well as the entry level Thunder Road line.

The easy-to-install panels come with a variety of options that cover the 1981-93 Dodge's message center, overdrive and cargo light options. Only commonly available tools are required for the installation, which can be performed by competent do-it-yourselfers in an afternoon. Complete wiring kits are available.

To see the various gauge styles and panel finishes now available for 1981-93 Dodge Ram trucks (both gas and diesel applications) visit [www.ClassicDash.com](http://www.ClassicDash.com) or call 866-882-3525 for additional information.

The panels are proudly manufactured in-house at Classic Dash's Carson City, NV facility.
