

DIGITAL PANELS FOR '60s THROUGH '80s TRUCKS AVAILABLE FROM CLASSIC DASH!

The increased popularity of digital gauges in classic truck applications has prompted noted dashboard manufacturer Classic Dash to expand its line with offerings for 1964-87 Chevy trucks. They are designed to accommodate the popular RacePak IQ3 and Holley EFI digital clusters designed for both street and competition use.

Manufactured in-house at Classic Dash's Carson City, NV facility, the panels are made of a rugged UV-resistant ABS composite material and designed for bolt-in replacement of the factory dash panel. They are matte black finished to compliment the RacePak and Holley units.

Classic Dash's digital and analog gauge offerings for 1964-66, 1967-72, 1973-83 and 1984-87 Chevrolet trucks can be viewed online at www.ClassicDash.com. Some 20 electrical and mechanical analog gauge styles are available, with analog-only gauge panels for 1988-94 Chevy trucks also available

Panels are easily installed using common tools and wiring kits are available. In addition to fitting classic Chevrolet C and K series trucks the 1967-up panels also fit corresponding GMC applications. They are offered complete with gauges (Racepak, Holley, Auto Meter, Classic Instrument or Thunder Road) or panels only. For additional information call 866-882-3525.
