

SNUGTOP EXPANDS AVAILABILITIES OF INNOVATIVE GB SPORT TOPPER

Snugtop, the trend-setting manufacturer of truck caps and tonneau covers, has added the popular 2015-2018 Ford F-150 Double Cab pickup with a 5.5' bed to the roster of vehicles that can be equipped with the firm's new GB Sport cap.

The GB Sport features sculptured side windows that compliment the sweeping, angular contours of today's pickup trucks. They're equipped with pop-out rear windows. Also of note is a subtle rear spoiler that incorporates an LED rear brake light and an all-glass tailgate with curved glass. The new GB Sport cap and F-150 look like they were literally made for each other.

Following in the tradition of premium grade truck caps from Snugtop, the GB Sport features a wrap-around rail with a double-bulb rubber seal, one-piece construction with a 5/8" honeycomb roof reinforcement and heavy-duty hinges and hardware with rotary tailgate latches and stainless steel rods. Important features include a Snugrug interior shell liner, an interior LED light and a fixed or sliding glass front window.

Painted to match factory colors using the Axalta ChromaPremier system, it carries Snugtop's Lifetime Warranty on paint and structure. Multiple rack options are available to expand recreational enjoyment.

Additional details can be found at www.Snugtop.com. All products are manufactured at Snugtop's massive facility in Long Beach, California.
