

UPGRADED DASH PANELS FOR 1981-93 DODGE TRUCKS

Classic Dash has expanded its lineup to include replacement instrument panels for 1981-93 Dodge Ram pickups, including both gas and diesel models. The new offerings include panels with provisions for 5" or 3-3/8" diameter speedometer/tachometer installations, plus four 2-1/6" gauges for keeping tabs on oil pressure, water temperature, fuel quantity and voltage.

The panels are made of a rugged UV-resistant ABS composite material and designed for bolt-in replacement of the factory dash. They are available in matte black, brushed aluminum and carbon fiber finishes. All are manufactured in-house at Classic Dash's Carson City, NV facility.

No less than 18 different style electrical and mechanical gauges are available; premium Auto Meter and entry level Thunder Road. Dash panels are also offered separately.

Classic Dash instrument panels are easily installed using common tools and complete wiring kits are available. All dash/gauge combinations can be viewed online at www.ClassicDash.com. Toll-free technical information can be obtained by calling 866-882-3525.
