

CLASSIC DASH INTRODUCES PANELS FOR TOYOTA FJ40/60 AND YJ JEEP

Owners of 1960-81 Toyota FJ40 Land Cruisers, 1981-87 FJ60 and 1987-95 Jeep Wranglers can now upgrade their dashboards with contemporary instrumentation from Classic Dash. The new dual-gauge FJ cluster includes a speedometer, tachometer and graduated oil pressure, water temperature, fuel quantity and voltage meters, with 3-3/8" and 2-1/16" diameter individual gauges for Jeeps.

Manufactured in-house at Classic Dash's Carson City, NV facility, the panels are made of a rugged UV-resistant ABS composite material and designed for bolt-in replacement of the factory dash panel. They are available in matte black, brushed aluminum and carbon fiber finishes.

The dual gauges, manufactured for Classic Dash by Auto Meter, are available with a white or black background, allowing the user to match or contrast the panel. Jeep panels feature a choice of 19 gauge styles from Auto Meter, Classic Instrument and Thunder Road.

Panels are easily installed using common tools and wiring kits are available. For off-roaders performing the popular LS engine swap a special package is also available. All dash/gauge combinations can be viewed online at www.ClassicDash.com. Toll-free technical information can be obtained by calling 866-882-3525.
