

NEW 2019 CATALOG FROM ART MORRISON ENTERPRISES

Noted chassis and suspension components manufacturer Art Morrison Enterprises has published the 2019 edition of its full-line catalog. The 72-page, full color publication contains both detailed product information, plus valuable technical content.

This includes an expanded listing of AME's trend-setting GT Sport chassis that are virtual bolt-in replacements for factory frames, yet provide contemporary ride, handling and stance. Offered for many popular 1940s through '70s cars and pickups, they also accommodate a wide range of engine and transmission options. Also showcased are the firm's Max G muscle car chassis, as well as CAD-engineered "builder" chassis for most any application.

AME also offers virtually everything needed to build the foundation of any mid-century (or later) restomod car or truck, from a complete front or rear clip to chassis tabs and brackets. Also included are key components for both coil-over and air spring suspensions—with Morrison's highly acclaimed Multi-Link I.R.S. at the top of the list.

The catalog can be downloaded at www.artmorrison.com, with a free printed copy sent upon request. Personalized technical assistance can be obtained by calling 800-929-7188.
