## **Aviaid Offers Pump Mounts For Accessory Drive Systems**

June, 2020  
FOR IMMEDIATE RELEASE

Lubrication systems pioneer Aviaid has developed a series of mounts that will adapt its dry or wet sump oil pumps to modular accessory drives, like Alston's CDS, or sprint car magneto drives.

With an increasing number of racers and street enthusiasts employing gear drives for centrifugal superchargers, it's a logical progression to also take advantage of this power source for the lubrication system and eliminate the chance of belt breakage. The primary drive shaft of the pump (hex or keyed) connects directly to the geared accessory drive.

Aviaid manufactures a wide variety of external oil pumps that range from compact single-stage wet and dry sump units to multi-stage dry sump applications in both Series 1 and Series 2 designs.

Founded in 1961, Aviaid Oil Systems is recognized as the industry pioneer in dry sump technology. For details on Aviaid's substantial lineup of oil pumps, drives, pans, tanks, regulators and accessories visit [www.Aviaid.com](http://www.Aviaid.com). For personalized tech assistance call 818-998-8991.
