Classic Dash, the industry's leading resource for bolt-in instrument panel upgrades, has recently expanded its offerings for 1967-68 Camaros to include a multitude of digital options. The panels are manufactured in Classic Dash's Carson City, Nevada facility using UV-resistant ABS composites in a choice of matte black, brushed aluminum or carbon fiber finishes.

The newest panels for Gen 1 Camaros can accommodate Racepak IQ3 gauges plus 6.86" and 7.5" diameter Holley EFI displays and available only in black matte finish. Panels for analog gauges include side-by-side 3-3/8" and 5" primary gauges, a 6-gauge panel with two 3-3/8" primary and four 2-1/16" secondary gauges — as well as center console panels for four 2-1/16" or 2-3/8" gauges. All three finishes are offered.

While the panels can be ordered bare, Classic Dash offers complete instrument packages that include gauges, a wiring harness and accessories like adapters for LS engine swaps. No less than 25 gauge styles, including Auto Meter, Classic Instruments AutoCross series and proprietary Elite series gauges are offered at very competitive prices.

Camaro owners are invited to visit www.ClassicDash.com and see which combination best suits their taste and budget. Classic Dash manufactures easy-to-install instrument panels for approximately 150 Muscle Car, Classic Trucks Sports Car and Off-Road applications. Call 866-882-3525 for details.
