1993-2001

2002-2007

2008-2011

Owners of Subaru's popular and potent Impreza/WRX manufactured between 1993-2011 can take advantage of the vast amount of data generated by AEM's CD-5 digital display through use of a special bolt-in instrument panels developed by Classic Dash. They are available for 1993-2001, 2002-2007 and 2008-2011 applications.

Manufactured in Classic Dash's Carson City, NV facility, the panels are made of a UV-resistant ABS composite material that features a black matte finish. The panels are easily installed using common tools. The AEM CD-5 is also easily installed, and has "one plug" connectivity.

The CD-5 has a full color 5" screen with seven programmable pages, plus a row of seven LED shift indicators (programmable and dimmable) at the top of the housing. It can interface with a wide variety of sensors that provide data ranging from engine functions to on-track performance.

Classic Dash also manufactures panels to accommodate Racepak and Holley EFI digital instruments, as well as analog gauges (two dozen styles). Complete panel/gauge/wiring packages available. Go to www.ClassicDash.com and check out the over 150 vehicle applications covered. Call 866-882-3525 for personalized technical assistance.
