50th Anniversary Catalog From Art Morrison Ent.

**JANUARY, 2021
FOR IMMEDIATE RELEASE**

<https://electronic-pr.com/2021/01/50th-anniversary-catalog-from-art-morrison-ent/> (opens in a new tab)

Noted chassis and suspension components manufacturer Art Morrison Enterprises is celebrating its 50th Anniversary in 2021 and marking the occasion with a special new catalog. In addition to information on the company's complete product line, the publication features some milestones and noteworthy vehicles that helped establish AME's leadership in the industry.

The hugely popular GT Sport line of "bolt on" chassis has been expanded to a dozen popular series of cars and trucks. They allow the builder to essentially unbolt the vehicle body from the stock frame and slide in a sophisticated new chassis that provides improved ride, handling and stance.

Morrison also offers a dozen front and rear suspension options with a lineup of 2x4 and 2x3 subframes that are CAD-engineered for any application. Highlighting them is AME's exclusive Multi-Link I.R.S. that comes with a choice of two center sections and three cradle options. And given the company's long history, AME has hundreds of vehicles in its massive database to expedite subframe projects.

With an eye to the do-it-yourself home builder, Morrison's catalog contains a plethora of chassis and suspension components and essential tools. Check the catalog out at www.ArtMorrison.com or get a printed copy. Call 800-929-7188 for personalized tech information.
