Expanded Inline Fuel Filter Offerings From System 1

**May, 2023
FOR IMMEDIATE RELEASE**

System 1 Filtration Products offers a wide selection of inline fuel filters for competition and street applications. They range in size from the large diameter long filter at 9" x 2-1/2" to the compact "Pro Street" model that measures 4-1/2" in length by 2" diameter. All are CNC-machined from 6061-T6 aluminum billet at System 1's Tulare, CA facility and black anodized.

Designed to be easily integrated into a variety of fuel systems, most are available with a choice of AN-06, AN-08, AN-10, AN-12 or 3/8" barb inlet/outlet fittings. The large diameter long filter only comes with AN-10, AN-12 and AN-16 ends.

Stainless steel mesh filtering elements are available with 35-micron or 75-micron ratings. The compact "Pro Street" filter supports a 10 GPM flow rate. Housing ends are sealed by means of O-rings, with a choice of Buna (use with alcohol) or Viton (compatible with gasoline, diesel fuel or nitromethane).

Additionally, System 1 offers a special 10-micron EFI fuel filter assembly that utilizes a special bolt-in mount. The company's other products include oil filters and oil pumps. They can be viewed at www.System1Filters.com, while personalized tech assistance is available by calling 559-687-1955.
