AME Introduces New Bolt-On K-Member For Mopar B-body

Owners of 1966-70 Mopar B-Body cars (Dodge Charger, Plymouth Road Runner, etc.) can enjoy improved handling, superior ride quality and a contemporary stance through installation of a complete bolt-on front suspension assembly from Art Morrison Enterprises.

The precision fixture-welded assembly features tall forged aluminum steering knuckles with bolt-on unit bearings, high strength forged steering arms and TIG-welded tubular steel control arms. A custom-valved 17.5:1 ratio power steering rack provides improved responsiveness and a modern “feel.” AME-tuned coilover shocks plus an adjustable tubular anti sway bar complete the package.

Engineered to accommodate late model Gen III Hemi engines, as well as earlier offerings, AME’s K-member lets you take advantage of modern suspension and tire technology for corner-carving prowess plus high-speed stability while maintaining classic Mopar styling.

Additional information is available on AME’s website at www.ArtMorrison.com or by calling 800-929-7188. E-mail inquiries can be directed to: sales@ArtMorrison.com. Founded in 1971, AME has grown from a 1-man fabrication shop into an industry-leading manufacturer of chassis and components now occupying five stand-alone buildings in Fife, Washington.
