## Upgraded Instrumentation For 1973-79 Ford Bronco & F-Series

July, 2024  
FOR IMMEDIATE RELEASE

<https://electronic-pr.com/2024/07/1973-79-broncos/>

The folks at Classic Dash make it easy to replace the “boxy” factory gauges with contemporary digital and analog panels. Made from rugged UV-resistant composite material, they are an easy bolt-in installation using common tools.

On the digital side, Classic Dash offers the big 12.3” Holley EFI panel that has a multitude of preprogrammed displays or can be customized to the truck owner’s wishes. The panel itself is matte black.

For those who prefer to get their information from traditional analog gauges, Classic Dash offers no less than 25 different styles from Auto Meter, Classic Instruments or the budget VeeThree line. You have a choice of matte black, brushed aluminum or carbon fiber panels.

To see how the various options look in your 1973-79 Ford F-series truck or Bronco visit [www.ClassicDash.com](http://www.ClassicDash.com)

or call 866-882-3525 for personalized technical assistance. Panels are manufactured in-house at Classic Dash’s Carson City, Nevada facility.
